

Lizemore Elementary

Game Night brought family and friends together.

Everyone couldn't wait to start playing!

Who doesn't enjoy a good game of UNO? The young man on the left was the undisputed UNO king of afterschool at Lizemore Elementary.

Bingo, anyone?

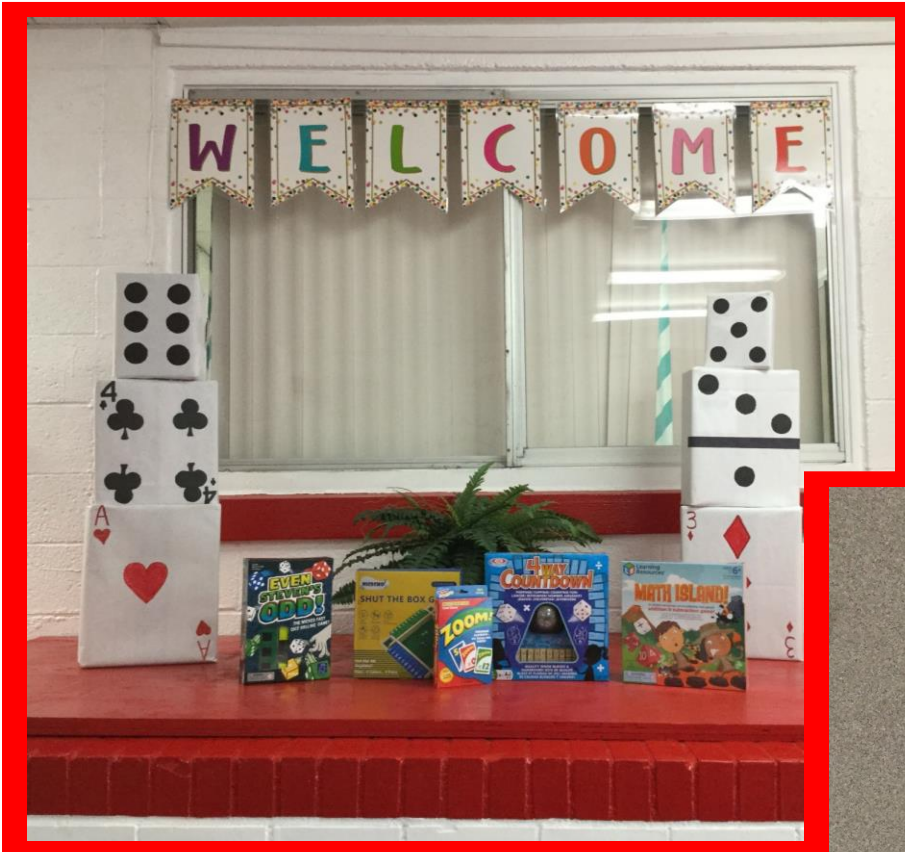

Students who attended 90+ hours were treated to a trip to Galaxy Lanes in Kanawha City.

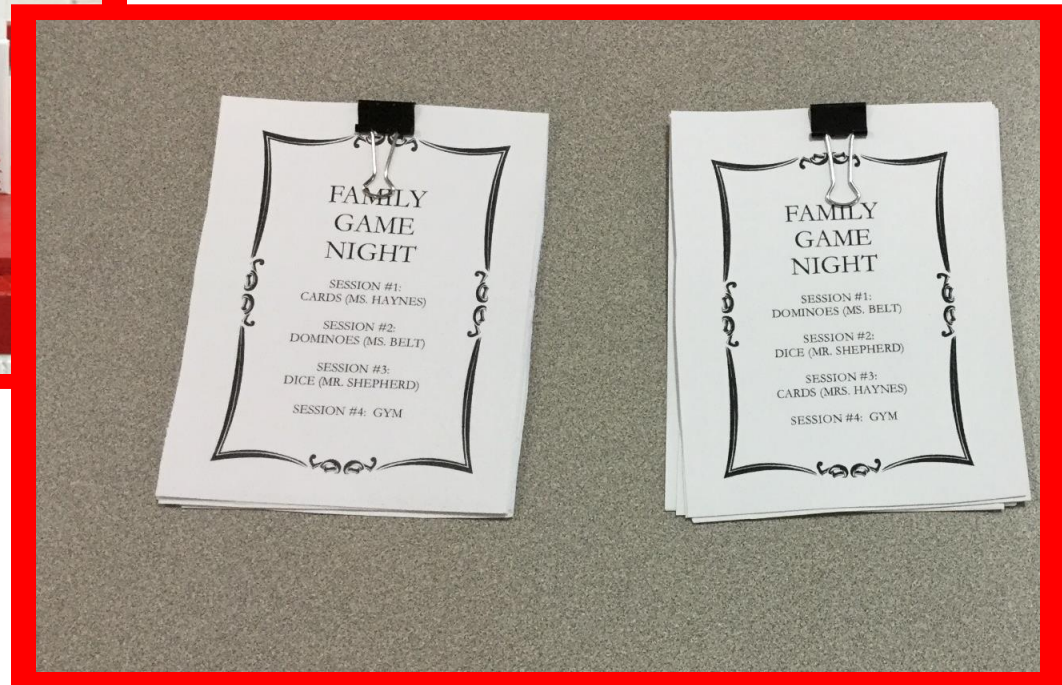

Knowing how to keep score is an important part of bowling.

H.E. White Elementary

A Family Math Night included fun sessions for students and their family members.

Math-related games were awarded as prizes throughout the evening.

K-1 students learned how playing cards could reinforce math skills.

Students in 2nd and 3rd grade were joined by family members to play math games.

4th and 5th grade students had family support, too.

Activities reinforced PEMDAS a.k.a. order of operations. As students and family members worked problems, they solved information in parentheses first, then exponents, next multiplication and division and, lastly, addition and subtraction.

Buckets filled with bags of goodies awaited students participating in the Easter egg hunt.

After searching the playground, these students show off their finds.

Big Otter Elementary

The afterschool program participated in a Family STEM Night. Here, teacher Jacey Collins measures out the ingredients for students to create a bouncy ball.

Assisting Jacey was afterschool teacher Joe Dawson, who found out too much glue is not a good thing!

K-1 students created their own maze.

Parents helped them test their work, seeing if a marble could pass through the maze.

Reading time is important time, and I was fortunate enough to have these three young ladies each read a book to me.

These 3rd grade students know being comfortable is key to good reading.

Clay Elementary

Hundreds of brightly colored eggs were just waiting for students participating in the annual Easter egg hunt.

Groups of students took turns seeing how many eggs they could collect.

Family members were on hand to help open eggs and see the surprises that waited inside.

Playing learning games with Ms. Lewis is one of K-1 students' most enjoyable times during afterschool.

Whether practicing phonemic awareness or playing a game of 4-Way Countdown, students know learning will be fun!

2nd and 3rd grade students share what they learned about dental health during Healthy Choices.

Found objects sometimes make the best art projects. Enrichment teacher Jessica McKinney collected dozens of caps and lids for students to use in creating this picture.
